

The XT3 server is the most flexible choice for today's live productions using high frame rate cameras. SuperMotion is the cornerstone of EVS' business and the XT3 works seamlessly with every available SuperMotion camera on the market. Production can be enhanced with two, three, four, six, eight or ten-times Super Motion capability to really propel the storytelling. With flexible twelve channel SD/HD, and 1080p or three channel 4K configuration, the EVS XT•3 can flex with any dynamic production need.
